OUR APPROACH

Investment Philosophy

1

Right Sector

We identify emerging and dominant sectors using a proprietary system to capture structural growth tailwinds.

2

Good Business

We invest only in businesses with balance-sheet defensibility, prudent capital allocation and durable economics.

3

Growth is Essential

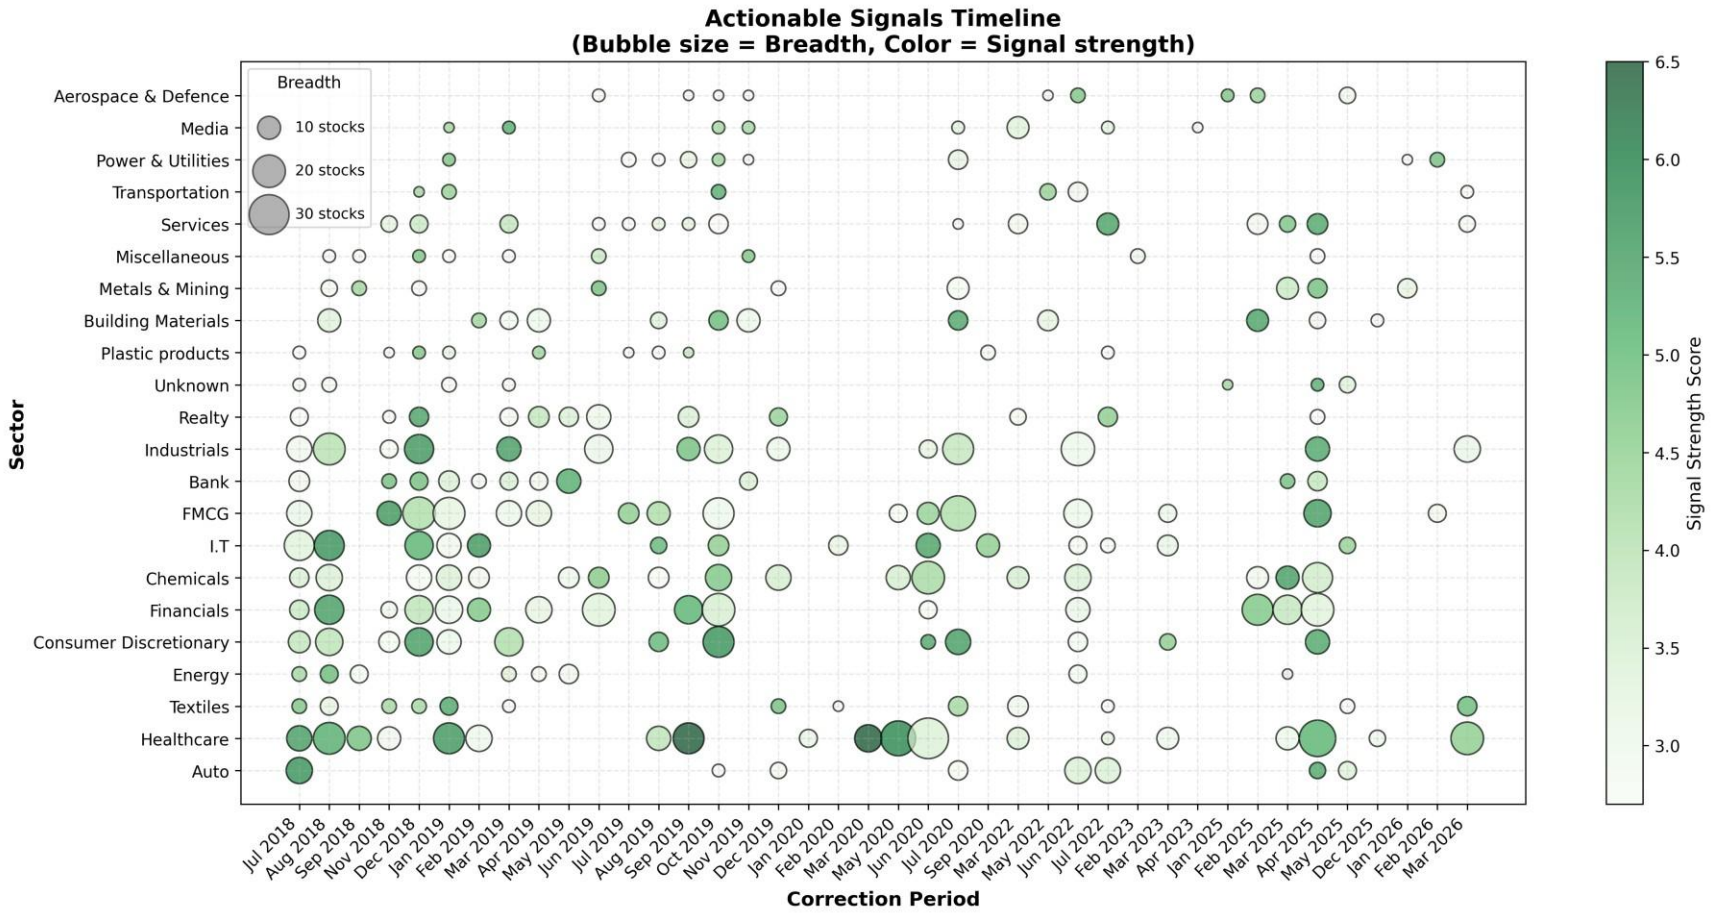

Earnings growth is the engine of compounding — we seek businesses where value migrates towards accelerated earnings.

4

Exits are Critical

Disciplined selling due to either growth slowdown, extreme valuations or governance disruption - protects capital.

1. Right Sector

Why It Matters

- **Spotting the top sectors in a market shift creates alpha**
- We built a Proprietary System to identify these sectors
- The bubbles present the stronger sectors to participate in
- Repetition of the bubble marks the continuity of sector-strength.
- Ideally, allocation in each of these sectors can be 25–30% of the portfolio, given the stocks meet the quality criteria.

2. Good Business

LOOK FOR

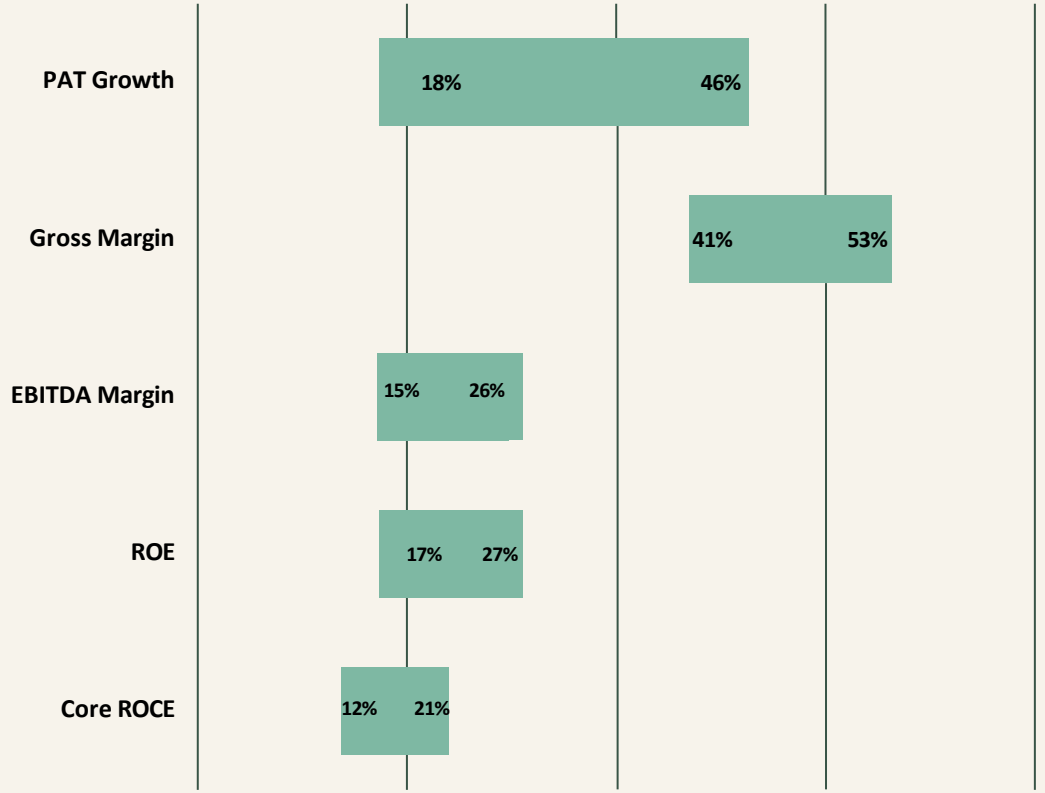

- Businesses with balance-sheet defensibility and prudent capital allocation
- Businesses which show high-growth and ROCE
- On-ground validation of investment theses

AVOID

Companies with leverage, disrupted industries, poor promoter background and/or declining growth.
